

Working with Apps and TICs in class

ELOISAHM 4 DE NOVIEMBRE DE 2020 15:42

Among us

Among us can be used to get to know each other better and have fun. This will help people meet new people they don't usually talk to and you could talk in another language to make it more educational :)

teachers could use social media like prezi to make presentations and use them in class

Facebook we can use it to do like a profile of different famous people of the history

we could use kahoot weeks before to review an exam and thus learn while having fun

Kahoot

We can use kahoot to make interesting and dynamic tests

AMONG US
Teamwork to discover something

Youtube

we can make a video with drawings explaining the units and upload it to youtube

Make tik toks in History, and make it about things that happened in the past like the French Revolution

Twitter

In Twitter you can post comments about your daily life. For example in Twitter there are posts of teachers or university students that can help you on your school subjects

With the kahoot put questions of the unit that we have learned and with those questions we will learn more quickly.

Twitter

Not just for criticizing Kardashian's or political's lives... Also is actually for getting the last pieces of news in a really shorter time

Kahoot to learn a unit

Kahoot

the kahoot application is used to learn any subject in a fun way and that the contents are learned quickly.

We can use WhatsApp to ask our partners if we have any doubt about something to get our companionship better

Instagram

Instagram can be used to upload polls in stories and for people to vote (the polls would have to be the ones we are giving)
