

TWO FACES OF TECHNOLOGY

What have I learnt about the talks we have attended to? Which is the talk or activity you have enjoyed the most? Which are the pros and cons about the New Technologies?

great poland

The technology has allowed us to communicate with people from other countries, which is incredibly amazing!

You guys are all so fun and cool, thank you for coming to Spain!

I appreciate the opportunity to be. It's a great way to see the difference between each nationalities. 😊

I personally think the first day was amazing, when we welcomed the students by showing them the school.

Thanks to technology i can easily keep in touch with friends and loved ones far away, and to learn much faster and access information quicker and even have fun

I really enjoyed the trip to Cartagena. It's so beautiful place 🥰

I am very happy that we visited beautiful places

I like this project, and i am very happy to learn so much thanks to it while enjoying it and having fun

Which is the activity you have enjoyed the most?

The activity that I've enjoyed the most is the first one that we did, the one where everybody had to talk to someone to know a little bit more about ourselves. It was really interesting the way we understood each other, even though we don't speak the same language.

Technology is usefull to spend a lot of time with my friends from other parts of world

Which is the talk or activity you have enjoyed the most?

The activity of knowledge, I really enjoy it!

Technologies let us communicate with people from different countries, however, we don't really take advantage of technologies, we just spend our time on useless apps.

This project is a great opportunity to find a new frineds and travel across the world. School in Murcia is really beautiful and students are so friendly.

This project is amazing. It's good opportunity to see new places, find new friends from different countries and get better in English.

being here is stressful for me but there are a lot of wonderful people

What have I learnt about the talks we have attended to?

From the talks we attended to I learnt that you have to be more careful about what you post in the Internet because it can be used against you.

I think technology is important, it helps in communication with friends from all over the world

What activity I enjoyed the most

I particularly liked the start of the event, since welcoming the others was a real fun activity to do, and to meet new people through the game, and to share that bond together, was a very good way of knowing each other

I am so glad to be here because I like meeting new people

Thanks to technologies, we can be in touch even though we live in different countries.
